

# LDCM Launch Party

## What is Launching?

The Landsat Data Continuity Mission (LDCM), scheduled to launch in February 2013, will be the eighth in the series of Landsat satellites. Since 1972, Landsat satellites have been observing and measuring Earth's continental and coastal landscapes at a scale where human impacts and natural changes can be monitored and characterized over time.

## Join the Global Party!

Get together with your community and classrooms to watch LDCM Launch live on NASA TV and have fun.

**Date:** February 11, 2013

**Time:** 10:04 AM PST

**Where:** Vandenberg Air Force Base

**Who can attend:** Invited guests

**For updates on party details visit:** [www.nasa.gov/landsat](http://www.nasa.gov/landsat)

## Have Fun!

- Watch LDCM launch!
- Win a contest!
- Participate in fun activities
- Learn about Landsat
- Make an image of your city
- Hear NASA scientists speak
